SUBJECT INDEX

Earth's magnetism
Simple wave motion in magnetoelasticity, *J. Bazer & Frank Karal* 127
Geometrical magnetoelasticity, *J. Bazer* 207
On the inflation of the geomagnetic field during a magnetic storm, *V. C. A. Ferraro* .. 419
Electrical conductivity structure by geomagnetic induction at the continental margin of Atlantic Canada, *R. D. Hyndman & N. A. Cochrane* 425
Electromagnetic induction in thin finite sheets having conductivity decreasing to zero at the edge, with geomagnetic applications—II, *Attia A. Ashour* 447

Mathematical concepts
Laplace transform inversion of rational functions, *I. M. Longman & M. Sharir* 299
Theory and computation of amplitudes of terrestrial line spectra, *Ari Ben-Menahem, Moshe Israel & Uri Levité* 307
The calculation of geophysical induction effects using surface integrals, *B. A. Hobbs* .. 481

Motion of the Earth
The excitation of the Chandler wobble by earthquakes, *F. A. Dahlen* 157

Physical properties of rock
Elasticity and equations of state of olivines in the Mg_2SiO_4–Fe_2SiO_4 system, *D. H. Chung* 511

Seismology
Observations of vertical and lateral *P*-velocity in the Earth's mantle using the Fenno-scandian continental array, *E. S. Husebye, R. Kanestrom & R. Rud* 3
A theoretical model of the NORSAR seismic noise field, *John H. Pfluke & James N. Murdock* 17
The attenuation of Love waves and toroidal oscillations of the Earth, *David D. Jackson* 25
Transmission and reflection of plane waves at an elastic-viscoelastic interface, *M. Schoenberg* 35
A linear model for the yield dependence of magnitude measured by a seismographic network, *Ulf Ericsson* 49
The propagation of surface waves in anisotropic media, *Stuart Crampin & David B. Taylor* 71
Spectral content of teleseismic *P*-waves recorded at the Hagfors Observatory, *H. Israelson* 89
Reflection, transmission and diffraction of *SH*-waves in linear viscoelastic solids, *Peter W. Buchen* 97
The NORSAR array and preliminary results of data analysis, *H. Bungum, E. S. Husebye & F. Ringdal* 115
The vibration of an elastic plane and half plane due to the sudden appearance of a crack, *Z. Alterman, R. Burridge & D. Loewenthal* 239
Dynamic shear cracks with friction as models for shallow focus earthquakes, *R. Burridge & G. S. Halliday* 261
Corner generated surface pulses, *Z. S. Alterman & D. Loewenthal* 285
The force system of the Chilean earthquake of 1960 May 22, *Ari Ben-Menahem* .. 407

Tides, Tidal current
The influence of topography and pressure gradients on shoaling in a tidal estuary, *R. C. McGregor* 469
